What is Bux AI

Bux AI is an AI-powered accounting automation service for businesses in Uzbekistan. We help entrepreneurs and accountants save up to 70% of time on routine operations: receipt recognition, tax calculation, bookkeeping, and answers on UZ legislation. Works via Telegram bot and web cabinet.

Who it's for

- Entrepreneurs and SMB owners
- Accountants and financial directors
- Sole proprietors (IP) and freelancers keeping their own books
- Teams needing fast consultations on UZ taxes

3 key advantages

Up to 70% time savings	AI handles routine work: document recognition, calculations, answers to typical questions.
UZ tax law expertise	Bux AI is trained on current UZ Tax Code, STC decrees, and OKED. Citations to laws included.
24/7 convenience	Telegram bot always handy, web cabinet — for deep work. Access from phone and computer.

5-minute quick start

Step 1. Registration

Open @BUX_Smart_bot in Telegram and tap «Start». You'll automatically receive a 20-day Pro trial — all features unlocked.

Step 2. Fill in company profile

The bot will ask for INN/PINFL, tax regime (general, simplified, IP), OKED code. This is needed for correct tax calculations and AI recommendations.

Step 3. First action — your choice

1) Ask the bot a question («What's the VAT rate in 2026?»). 2) Upload a receipt photo — AI extracts the details. 3) Open your web cabinet on bux-ai.uz via the link from the bot.

Complete feature catalog

46 key system capabilities — taxes, foreign trade, legal factory with 38 contract types + AI review

BLOCK 1. Telegram bot

Feature	How to use	Benefit	Plan
Chat with AI accountant	In @BUX_Smart_bot, ask a question in text. Example: «What's the VAT rate for services in 2026?»	Instant answer 24/7 with citation to specific UZ Tax Code article	Free
Voice messages	Record a voice message in the bot — AI transcribes and answers. Works well in Russian and Uzbek	Convenient on the road — no typing needed	Pro
Receipt and invoice photos	Photograph a receipt/invoice and send it to the bot. AI extracts: amount, date, supplier INN, VAT	Saves up to 5 minutes per document vs manual entry	Free
Document classification	After recognizing a receipt, the bot suggests a category: «With VAT», «No VAT», «For income tax». Confirm or change	Correct classification for VAT deduction and reporting	Pro
UZ tax consultations	Ask any question: «When to file VAT?», «Is EHF needed?», «How to close an IP?». AI answers with step-by-step plan	Replaces paid consultations (~500-1000K UZS) — free or via Pro	Free
Tech support via /support	In @BUX_Smart_bot, send /support and describe the problem (login, payment, error, bug). The AI agent replies right away and escalates to the team if needed.	Instant 24/7 help right in the bot — no waiting for email	Free

BLOCK 2. Personal cabinet: basic work

Feature	How to use	Benefit	Plan
Home — KPI dashboard	At bux-ai.uz/cabinet you see 4 key metrics: monthly expenses, income, taxes, balance	Business state at a glance — without opening reports	All
Q&A; history archive	«Q&A;» section — all your bot questions with answers. Search, date filter, export	No need to remember — everything is saved. Precedents help next time	All
Document archive	«Documents» section — all uploaded receipts/invoices with extracted data. Download original or CSV	Ready-made database for the accountant — no paper hunting	Pro
Error and activity logs	«Logs» section — what happened with your account, when and which errors. Full audit history	Transparency: always see who did what and when	Pro
My documents	In the cabinet, the «My documents» section — the full history of generated files (contracts, orders, letters, acts). Re-download or delete.	All your documents in one place — re-download anytime	All
Bux AI browser extension	In the cabinet's «Extension» section, get the linking code and install the extension. Works on my.soliq.uz and Didox: form auto-fill and signing via your EDS.	File reports right inside government cabinets without manual copying	Pro
Electronic digital signature (EDS)	In the cabinet, the «EDS» section — connect your key. The key stays on your device, Bux AI prepares the documents, you sign and submit to my.soliq.uz/Didox.	Sign and submit reports without sending the key to the server — under your control	Pro

BLOCK 3. Tax analytics

Feature	How to use	Benefit	Plan
Calculation of 7 ILOVA forms	In «Taxes» → «ILOVA forms». Auto-calc from your data: VAT, profit, social, NDFL, etc.	Ready numbers for my.solliq.uz — copy without recalculation	Pro
Yearly tax forecast	On «Taxes» page — forecast per tax for 3, 6, 12 months. Method: extrapolation + AI	Cash-flow planning: know when and how much to reserve	Pro
AI optimization recommendations	On «Taxes» → «Recommendations». AI compares your burden with OKED average and suggests legal optimization paths	5-20% tax savings via legal benefits you might have missed	Business
PDF / Excel export for my.solliq.uz	On «Taxes» tap «Export» → choose PDF or Excel. File ready for verification and archiving	Document for accountant and inspector in branded format	Pro

BLOCK 4. Security and team

Feature	How to use	Benefit	Plan
Active sessions and revocation	In «Security» see all devices where your account is open. «Revoke» button — sign out from device	Security when phone is lost or upon suspicious activity	All
Two-factor authentication (2FA)	«Security» → «Enable 2FA». On login, bot sends one-time code. Can configure TOTP app	Protection from password breaches — even with the password, no entry without your phone	Pro
Team — invite accountant/director	In «Team» → «Invite». Email + role (admin / accountant / viewer). Invitee receives a link	Collaboration: you — strategy, accountant — details. Granular permissions	Pro
API keys for integrations	In «API» → «Create key». Key shown once — save it. Use for 1C, own scripts, Zapier	Deep integration: auto-sync data from 1C to Bux AI and back	Business

BLOCK 5. Account management

Feature	How to use	Benefit	Plan
Billing and payment history	In «Billing» — current plan, next charge date, payment history, plan change, cancellation	Full spend control — no hidden charges	All
Referral program	In «Referrals» — your personal code BUX-XXXXXX. Share it — for each active client +1 month Pro free	Free Pro extension in exchange for recommendations to friends	All
Export all data as ZIP	In «Profile» → «Export data». Get a ZIP with profile.json + 7 CSV files (documents, Q&A, payments, etc.)	Your data — yours. GDPR-compliant. Can migrate to another system	Pro

BLOCK 6. Foreign trade (import/export)

Feature	How to use	Benefit	Plan
UZ foreign trade consultations	Ask the bot anything about foreign trade: duties, rates, INCOTERMS, currency control, contracts. AI answers with UZ Customs Code citations	Replaces paid foreign trade consultations (1-3M UZS) — instant, 24/7	Free
Import VAT calculation	Send the bot: «Import \$X from country Y, HS code Z» — AI calculates VAT: (customs value + duty + excise) × 12%	Precise calculation before contract — know full import cost	Pro

HS / TNVED code lookup	Send HS code or product description to the bot. AI returns: duty rate, VAT, excise, required certificates, restrictions	Correct HS code selection can save 5-30% in duties — critical for large volumes	Pro
INCOTERMS 2020 selection	Describe the deal: «Sea delivery from China, volume X». AI suggests proper term (EXW/FCA/FOB/CIF/DAP) and explains risk allocation	Protection from surprise shipping and insurance costs — know upfront who pays for what	Free
Foreign trade checklists	Ask the bot: «What's needed to import from Turkey?» — get full checklist: documents, contracts, certificates, approvals	Don't miss anything — saves 1-3 days of border delays	Free
Export contract generator	In cabinet «Foreign trade» → «Contracts» → «New». Fill parties, goods, INCOTERMS, payment — get ready docx in RU/EN/UZ	Legally sound contract in 10 minutes vs 5-10 days with a lawyer (saves 2-5M UZS)	Pro
Import contract generator	In cabinet «Foreign trade» → «Contracts» → «Import». Accounts for UZ currency control requirements and bank registration	Contract immediately ready for bank registration — no rework or complaints	Pro
Customs payments calculator	In cabinet «Calculators» → «Customs». Enter: HS code, country, value → get duty + VAT + excise + fees calculation	Precise import budget before signing — no customs surprises	Pro
Customs declaration helper (IM-40 / EK-10)	Upload invoice/contract to cabinet — AI fills draft declaration with correct fields 31, 33, 42, 47	Saves 1-2 hours per declaration — all figures calculated and verified	Business
Export VAT refund	In cabinet «Foreign trade» → «VAT refund». Tracks 180-day currency revenue deadline, assembles document package for STC	Don't miss VAT refunds — for large exporters this is 10-100M+ UZS in real cash	Business
UZ CBU rates on declaration date	When filling declarations or payments, AI auto-fills CBU rate for the required date — no manual cbu.uz lookup	No currency conversion errors — all figures at official regulator rate	Pro
Certificates of origin	Ask the bot: «What certificate do I need to export to Russia?» — get answer: CT-1 for CIS, EUR.1 for EU, A for GSP. Plus step-by-step issuance guide	The right certificate reduces import-country duties by 5-30%	Pro
Currency control	In cabinet «Foreign trade» → «Currency control» tracks deal passports, currency arrival deadlines, repatriation. Auto-reminders 30 days before deadline	Protection from CBU fines (up to 100% of unreceived amount) and account blocks	Business
Preferences by country	Ask the bot: «What preferences does UZ have with China/Turkey/EU/CIS?» — get tariff preferences table (FTAs, GSP+)	Pick partner countries with lowest duties — strategic advantage	Pro

BLOCK 7. Legal factory (contract generation and AI review)

Feature	How to use	Benefit	Plan
38 contract types via AI	In cabinet «Legal factory» → pick type (sale, rent, services, work, loan, etc.) → AI generates .docx	Replaces lawyer in 90% of cases: 30-sec contract vs 5-10 days	Pro
AI review of foreign contract □	Upload PDF/docx from counterparty → AI finds risks, missing clauses, scores favorability 0-100	Saves 500K-1M UZS in lawyer fees + protection from predatory terms	Pro
Telegram /contract command	In @BUX_Smart_bot send /contract → pick category → type → describe terms in one message → get .docx	Contract right in Telegram without opening the site — for urgent cases	Pro

Telegram /review command	Send /review → pick your role (Buyer/Tenant/Contractor/...) → attach PDF → report in chat	30-sec contract review right in the bot — no site needed	Pro
3-language generation (RU/UZ/EN)	In contract form — language selector. AI generates legally sound text in chosen language with UZ Civil Code references	Contracts for foreign partners without legal translator services	Business
11 UZ Civil Code categories	Catalog by category: Sale · Rent · Work · Services · Finance · IP · Corporate · Labor · Foreign trade · Family · Auxiliary	Covers all 11 UZ Civil Code groups — no need to use another service	Pro
Auxiliary documents	Beyond contracts: handover acts, work completion acts, invoices, waybills, powers of attorney, NDA, claim letters	Full document workflow — no other services needed	Pro
Contracts and reviews history	All created documents and AI reviews are stored in cabinet. Search by attributes, filter, re-download	Ready contract database for audit and tax inspections	All

Frequently asked questions

Is my data secure?

Yes. All data is stored in an encrypted PostgreSQL database on a VPS in protected infrastructure. Data transfer is HTTPS-only. Only you and invited team members can access your data.

What if the AI gives a wrong answer?

Bux AI is trained on current UZ Tax Code and STC decrees, but is an assistive tool. Before filing actual declarations, verify with an accountant. Responsibility for final decisions is yours.

Can I cancel my subscription anytime?

Yes, in the «Billing» section of your cabinet. After cancellation you keep Pro until the paid period ends, then automatically switch to Free. Data is not deleted.

What's included in the 20-day trial?

Full access to all Pro features: unlimited AI chat, tax analytics, data export, team invitation (up to 3 people). No card required. Just register via the bot.

Does Bux AI work in Uzbek?

Yes. Both bot and cabinet support 3 languages: Russian, Uzbek (latin), English. Switch in profile settings or via /lang command.

Can I invite an accountant to my account?

Yes, in the «Team» section of your cabinet. Invite by email, the accountant registers separately and gets access with the «accountant» role (no billing changes or data deletion rights).

Is there 1C integration?

Yes, via API keys (the «API» section in your cabinet), and a direct 1C connector is planned for 2026 Q3. For now, all data can be exported to CSV/Excel for manual 1C import.

Where can I follow updates?

Subscribe to @BUX_AI_News on Telegram. All releases are also published on bux-ai.uz/changelog.

Contact and support

Telegram bot: @BUX_Smart_bot (main work channel)
